

E P I S O D E 1

Efficient clinical supply chain with N-SIDE

CTS inefficiencies and their main drivers

E P I S O D E 1

Clinical supply chain
is an inefficient
industry due to its
complexity.

But how do we define
inefficiencies in
clinical supply?

E P I S O D E 1

Inefficiencies in clinical supply cause:

-  Risk of drug shortages
-  Waste of drug
-  High costs
-  High emissions
-  High workload

to name but a few But how can we **avoid** these?

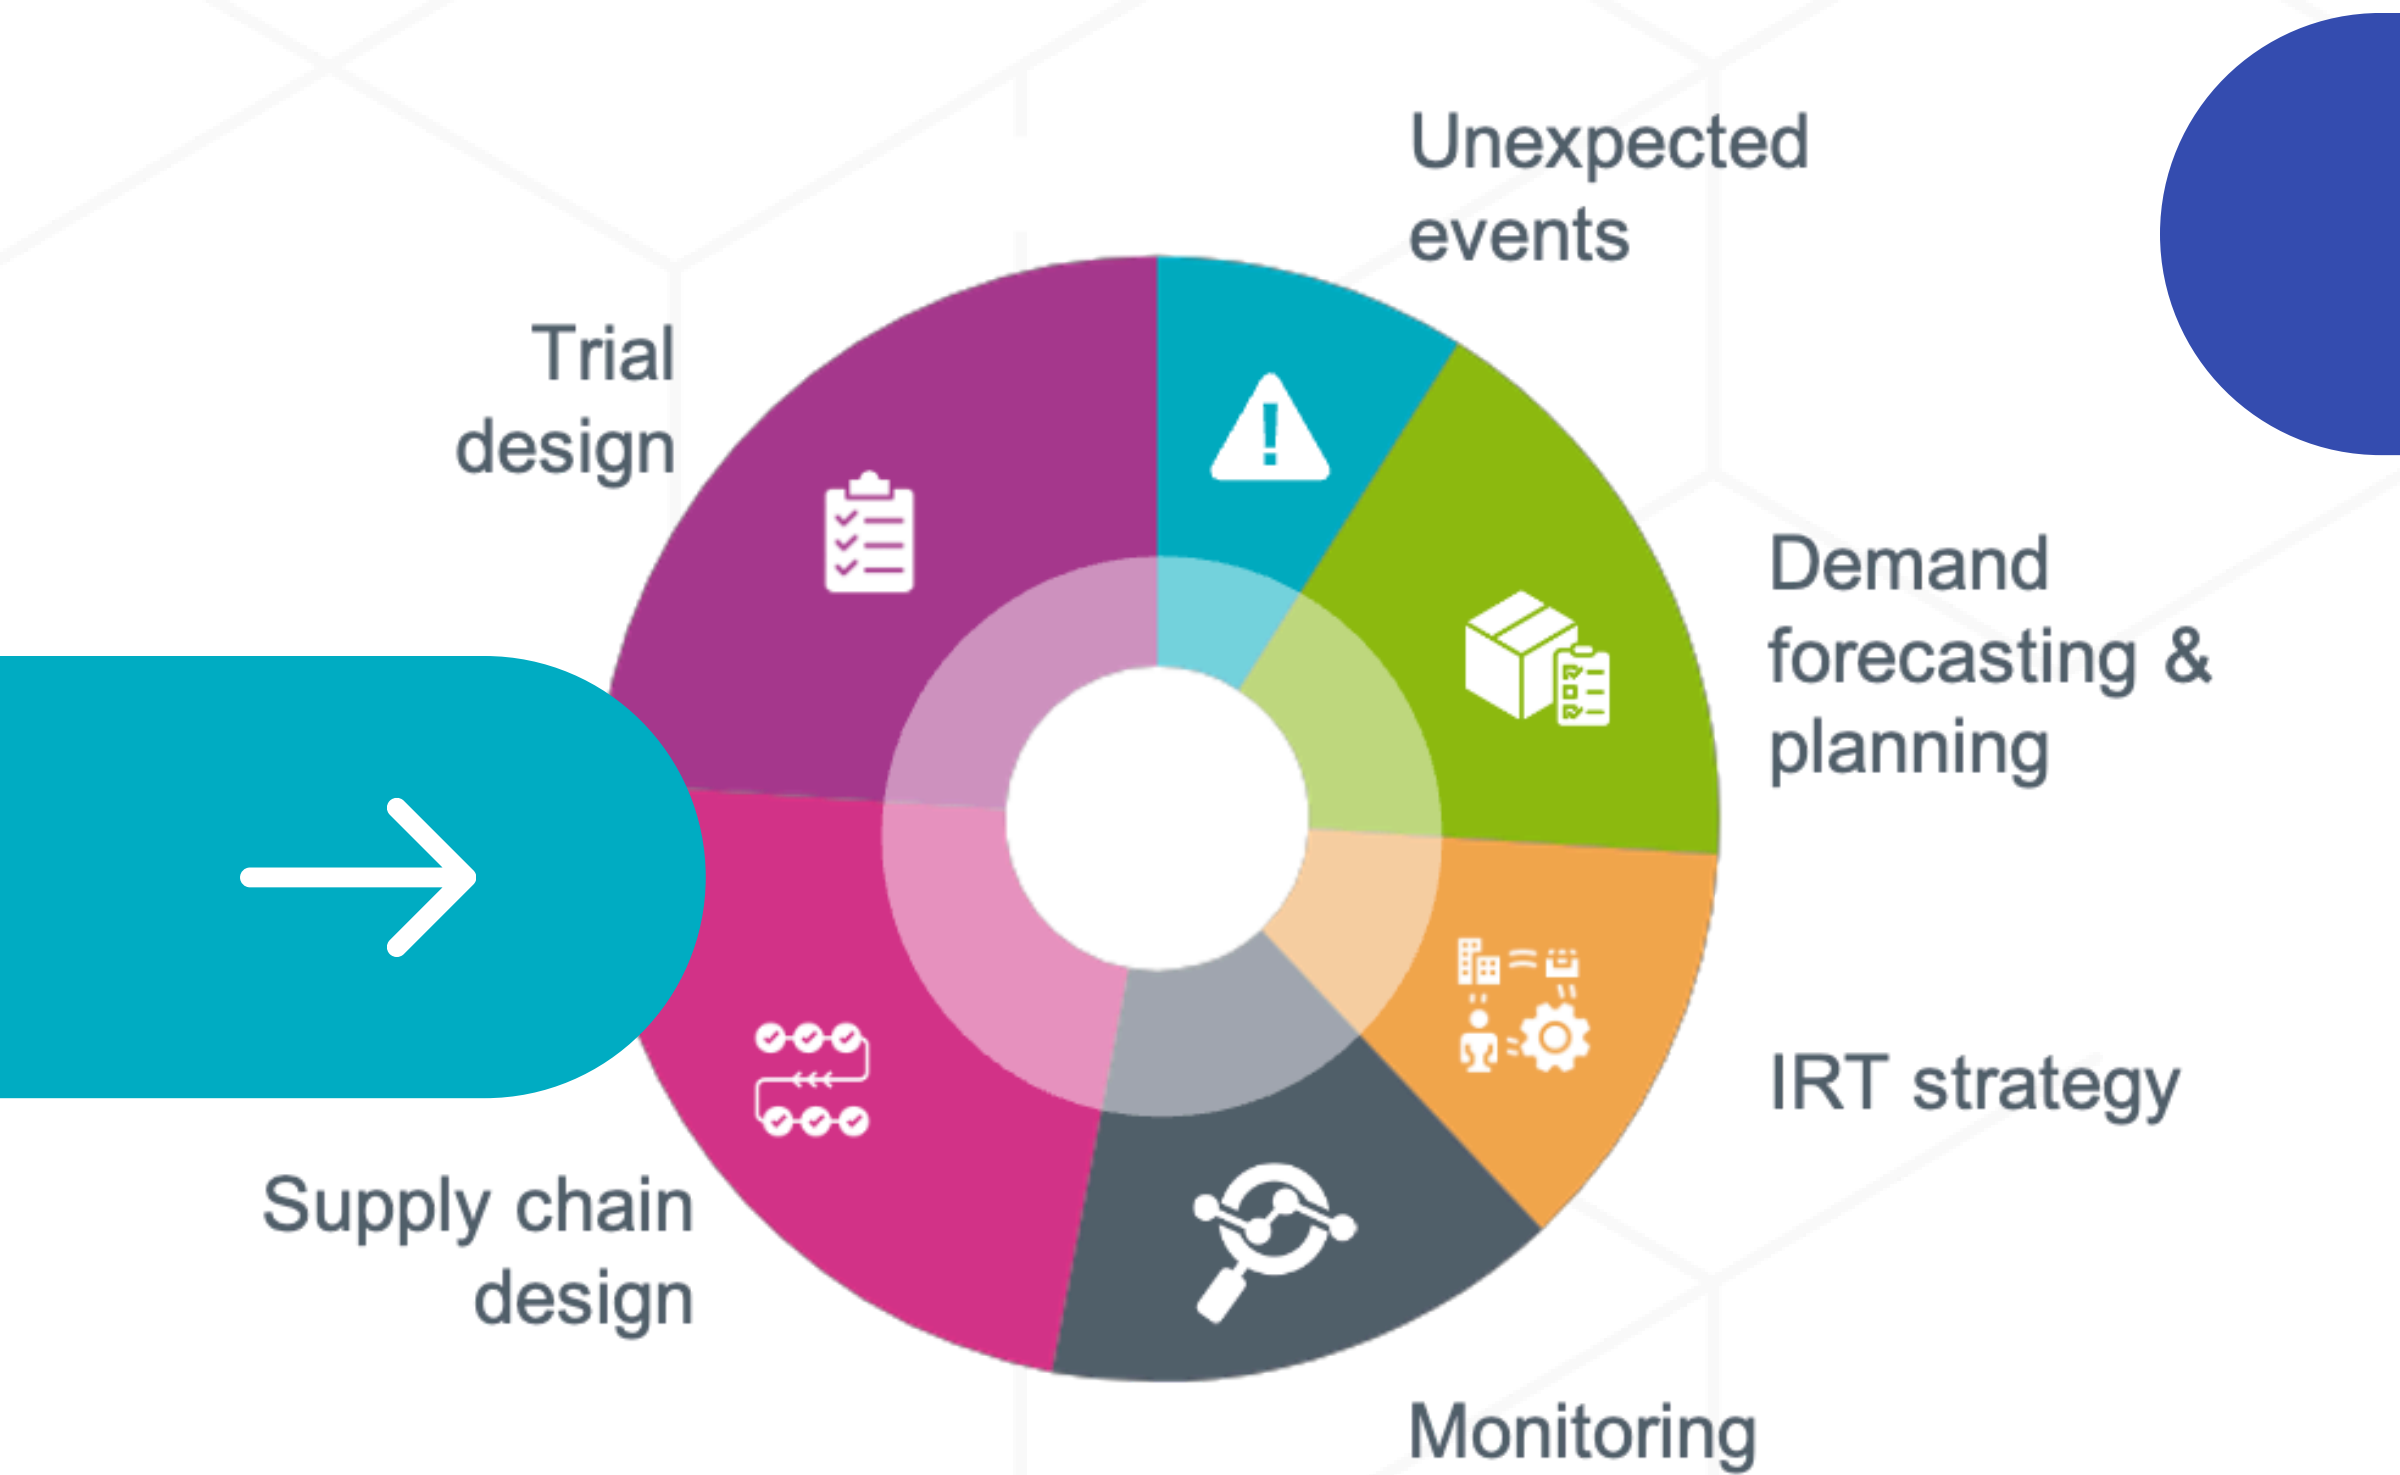

E P I S O D E 1

Thanks to N-SIDE's experience on **over 12,000 trials**, we have identified the main drivers of inefficiencies in clinical trials. And the **solutions** to tackle them!

Swipe to discover the **6 main drivers** of inefficiencies on the next slide!

E P I S O D E 1

E P I S O D E 1

Starting next week, we will be diving into **each of these drivers** one at a time.

Don't miss our next episode in a few days!
Our first focus will be the trial design.
