

E P I S O D E 5

Efficient clinical supply chain with N-SIDE

Drivers of inefficiencies #4 - Your demand
forecasting and planning

EPISODE 5

Forecasting and planning technology is becoming widespread.

Companies are just starting to understand how much impact it can have on supply chain efficiency.

EPISODE 5

Missing or oversimplifying the following steps can cost you!

Continue to swipe to learn about 5 crucial steps you should add to your strategy.

EPISODE 5

The demand

You should always accurately represent your demand.

Take into account:

-  Recruitment
-  Titrations
-  Weights
-  and more

E P I S O D E 5

The design

You should always accurately model your trial and supply chain design.

Take into account:

-  Lot pooling
-  Re-randomizations
-  Country regulations
-  Direct-to-patient

E P I S O D E 5

The product

Make sure to have an accurate representation of your expiries and the sites resupply.

EPISODE 5

The overage

Calculate your overage. It should be **different**:

-  Per release
-  Per country
-  Per kit type
-  And for **each trial design**

EPISODE 5

The algorithms

Ensure you are using the right algorithms for your needs:

-  Stochastic (simulations)
-  Deterministic (forecasting)
-  Optimization
